EDUCATION

Bachelor of Technology (B.Tech.) – Computer Science and Engineering | Expected 2028
ABES Engineering College | Dr. APJ Abdul Kalam Technical University (AKTU)
CGPA: 7.81 / 10

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, PHP, Rust

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, SQL, Operating Systems, Computer Networks, Computer Organization and Architecture

Web & Backend Development: HTML, CSS, React, Node.js, FastAPI, REST APIs

Databases & Data: MySQL, NumPy, Pandas

Machine Learning & Explainable AI: Natural Language Processing, PyTorch, GloVe embeddings, BiLSTM, Attention, LIME

Developer Tools: Git, GitHub, Visual Studio Code, MySQL Workbench

PROJECTS

Fake News Detection using Deep Learning and Explainable AI | 2026

- Developed a fake-news classification pipeline using 100-dimensional GloVe word embeddings, a 256-unit bidirectional LSTM, and an attention mechanism to classify articles as REAL or FAKE.
- Trained the model on 62,717 cleaned WELFake samples and achieved 98.09% accuracy on the held-out in-domain test set.
- Evaluated the trained model on the external FA-KES dataset without retraining, fine-tuning, or threshold adjustment; obtained 51.37% accuracy, highlighting the challenge of cross-dataset generalization.
- Applied LIME to 200 external-dataset predictions, equally distributed across true-positive, true-negative, false-positive, and false-negative cases, to inspect feature-level explanations.
- Built a demonstration workflow with a FastAPI prediction backend and React frontend; used PyTorch for model implementation and inference.

Assessify – Student Assessment and Examination Portal | 2025

- Developed a student assessment portal concept with separate student-facing and administrator-facing interfaces to support assessment and portal-management workflows.
- Designed anti-cheat-oriented features to help maintain assessment integrity and support a more controlled online examination experience.
- Focused on organizing core portal functionality around student access, administrative oversight, and assessment-related operations.
